HOW CAN WE HELP?
You face a unique set of challenges when designing parts for the healthcare industry. In addition to maintaining an effective manufacturing and supply chain operation, you’re challenged with designing products that must meet strict regulatory and quality assurance standards. We can help. Our dedicated healthcare team offers much more than the world’s most advanced polymer materials, we’re ready with product design assistance, material selection guidelines, manufacturing support and supply chain optimization in order to expedite your time to market.

HEALTHCARE MATERIAL SOLUTIONS AT A GLANCE
When it comes to performance, you need to demonstrate value and measurable results from your medical device materials. Our dedicated resources are here to help you do just that. We can take the guesswork out of material selection by offering a broad portfolio of solutions that meet diverse requirements. From medical device housings to labware, imaging and much more, we have you covered.

HEALTHCARE FOCUS AREAS
Supplying the healthcare industry with devices that improve patient care is always your top priority. You can count on our 30+ years of material know-how and regulatory experience when navigating the industry and getting your device to market both safely and efficiently.

- Catheters & Tubing
- Device Housings/Enclosures
- Drug Delivery Devices
- Fluid Management
- Labware & Diagnostics
- Medical Equipment
- Medical Device & Pharmaceutical Packaging
- Surgical Devices
- Wearable Monitors & Handheld Devices
